OUR TEAM The Elk Grove Soccer Club is a non-profit organization dedicated to providing all of our players a structured soccer environment that promotes FUN, good sportsmanship, and great soccer.

Our team is comprised of parents, coaches, youth and adult players. We play in leagues through the NPSL and in tournaments through Soccer Bowl Alliance. We are avid supporters of local youth soccer development in Elk Grove. We believe that with access to a club soccer environment children can excel in school, and can reach their full potential in sports. We strongly believe in the positive impact that participation in recreational soccer has on children's self-confidence and self-respect as well as their overall sense of well-being. Our Mission The Elk Grove Soccer Club is committed to positive social change by educating and empowering children and families to develop a love and appreciation for the game of soccer. The Elk Grove Soccer Club seeks to work collaboratively with its membership to: Develop opportunities for children to participate in healthy and safe activities Provide equipment and facilities to develop players' skill and confidence Educate and support parents/coaches to motivate and encourage players and families to enjoy and participate in the game of soccer Provide educational programs to help players develop good sportsmanship and team-work skills Our Vision Our Vision is to be a true grassroots community organization dedicated to changing the lives of children and families for the better through the game of soccer. By encouraging, educating and empowering parents, youth and adult players, coaches, and administrators to develop a love for the game of soccer, we believe that a healthier society is in our future. Comparison of stereotactic body radiation therapy with whole-brain radiotherapy with or without chemotherapy for brain metastases: results from two randomized trials. For patients with newly diagnosed brain metastases, efficacy and safety of stere

The world insurance companies receiving that I may be Aging of the nervous system: molecular mechanisms and diseases. The maintenance and renewal of the nervous system is critically affected by cellular aging and several forms of neurodegenerative diseases. Increasing age is associated with declined cell-type specific and total synaptic function as well as increased susceptibility to neurodegenerative disorders. Age-related cognitive and behavioral deficits are experienced by more than half of the elderly worldwide. In parallel, healthy neurons undergo important changes in gene expression and morphology. The plasticity of the aging brain offers exciting, but also challenging opportunities for neuroregeneration and functional recovery.## 6.8.
