(Tab key) is a new line character. is a new line character. is a new line character. Now, you can use the file to add or change the threshold factor. Q: Determinant of  $aI + bJ$ , where  $a, b \in \mathbb{R}$ ? How to compute the determinant of  $aI + bJ$ , where  $a, b \in \mathbb{R}$ ? I have no idea to calculate it. Any help will be appreciated. A: Hint: If  $\lambda, \mu$  are the eigenvalues of  $aI + bJ$ , then the determinant of  $aI + bJ$  is  $\det(aI + bJ) = \lambda a - b \mu$ . Hint:  $\det(aI + bJ) = \det\begin{pmatrix} a & -b \\ b & a \end{pmatrix} = a^2 - b^2$ . 1. Field of the Invention The present invention generally relates to a fire suppression sprinkler system and, more particularly, to a novel spraying angle for a fire suppression sprinkler head. 2. Prior Art In fire sprinkler systems, there are typically several sprinkler heads arranged in different patterns throughout a building. Sprinkler heads may be mounted above or below ceiling panels or in wall cavities. One of the functions of a sprinkler head is to discharge a stream of water outwardly in a predetermined direction. Each sprinkler head is typically mounted to a supporting structure, such as a ceiling tile, ceiling grid,
