AutoCAD's sales over time. Today, AutoCAD is used

in a variety of
manufacturing,
construction, and
engineering fields
by architects,
mechanical
designers, civil
engineers,
programmers,
and many others.

AutoCAD is increasingly used for creating visual design workflows that connect disparate software applications (such as

ConceptDraw or
Microsoft Office),
as it was
originally
intended.

AutoCAD is used
for creating
technical design
drawings in an
industry known

as CAD / CADD
(Computer Aided
Drafting /
Computer Aided
Design). CAD,
Computer Aided
Drafting,
Computer Aided
Design Computer-
aided design

(CAD) is a branch of computer graphics and data visualization, that makes use of computers to create drawings. The aim is to produce 2D or 3D

drawings that convey the shape and geometry of the design in a precise and easy-to-interpret way, providing the designer with information such as support

structures,
material details,
mechanical
interfaces and
electrical
connections.
There are a wide
variety of
commercial CAD
applications

available. These can be broadly categorized as drafting packages, and more specialist applications that have a specific design goal. A common feature

of CAD packages
is that they can
be used for a
wide variety of
purposes, such
as simple
drawing and
measurement,
construction
design and

engineering, or
intricate
engineering
design. AutoCAD
is a popular CAD
package, with
some 200 million
licensed users
world-wide. It is
used in a wide

range of fields,
including:
Architecture,

CAD / CAM
AutoCAD is one
of the most
popular CAD
programs. This
includes 2D
drafting (drawing

straight lines and curves), 3D modeling (creation of geometric shapes, solids, and surfaces), and 2D/3D drafting. It is used by

architects,
landscape
architects,
interior
designers, and
others. The most
common use of
CAD in
architecture and
landscape design

is to create
detailed, high-
resolution 2D
drawings,
particularly in
rendering.

automobile.
These containers usually have a hinged lid which is opened for the loading and unloading of material into and out of the container. The

size of these containers generally range from six to twelve cubic feet in volume. The use of such containers is limited to material which

can be easily
handled and
loaded into and
out of the cargo
area of the truck
or automobile.
When the vehicle
reaches a
useable or
storage area, the

hinged lid is lifted
off of the
container and
placed against
the wall or other
structure to
which it is to be
attached. This lid
is then used for
the storage of

materials which require only a limited amount of space. It has been suggested that a cargo area be designed specifically for the attachment of such

containers. In such case the vehicle would not have a conventional cargo area but only a storage area having a fixed wall to which the hinged

lid can be attached. The container in this case could be loaded and unloaded without having to lift the lid. One problem in providing such a storage area is

that it must be fixedly located in the vehicle. This makes it difficult to transport the vehicle when the storage area is not needed. Another problem is that it is

difficult to allow
the lid of such a
container to pivot

desired radius.

Introducing
Markup Assist
Markup Assist
Markup Assist is

a visual feedback tool that helps AutoCAD users quickly learn how to edit drawings in an efficient, productive way. With Markup Assist, you can take the steps

that you need to complete a drawing task, visually and interactively, right on the drawing canvas. Work with Markup Assist to be more efficient

in your working
life. (video: 2:35
min.) Markup
Assist makes
working with your
drawings easier
by eliminating
the manual parts
of drawing edits,
such as drawing

object handles,
by providing a
visual experience
that guides you
to where you
want to go, and
only where you
want to go. When
you make edits
to the drawing,

Markup Assist handles the rest. When you are finished, it will automatically close the window and generate any new objects that may be necessary. Learn

more about
Markup Assist in
the Markup Assist
overview video.
Markup Assist is
a technology
preview for
AutoCAD version
2023. If you have
feedback for

Autodesk and AutoCAD, please visit the feedback site at autodeskfeedback.com, or contact autodeskfeedback@autodesk.com. Note: Markup Assist will be available only

to users who are running the technical preview version of AutoCAD and who are logged into their home network account. Users who have not logged into

their home network account will not have access to Markup Assist. You can connect your system to your network using AutoCAD Viewer. Improving your
